

US 287 Signal Improvement Project in Longmont

PROJECT OVERVIEW

The Colorado Department of Transportation and contracting partner Sturgeon Electric will begin signal improvements on US Highway 287 on May 9. The project will take place on US 287 at Mountain View Avenue and 6th Avenue.

Work will include the removal and installation of traffic signal equipment, poles, mast arms, pedestrian push buttons, signing and vehicle detection upgrades. Crews will also install Americans with Disabilities Act (ADA) compliant curb ramps. The new ramps will be in compliance with the Public Right of Way Accessibility Guidelines (PROWAG) requirements and will provide functional accessibility to all travelers using our state and US highways.

PROJECT BENIFITS

Traffic signals are a vital part of controlling traffic in a safe and efficient manner by providing regulated movement. Vehicle detection will reduce unnecessary delays and stops at the intersection while improving travel times and increasing the amount of traffic that an intersection can handle.

PROJECT SCHEDULE

Hours of operation are Monday through Friday 8:30 a.m. to 3:30 p.m. The project, starting in May, has an anticipated completion date of July 2022.

TRAVEL IMPACTS

Motorists should plan for single-lane closures.
